ABBOT GARDENS

and

NURSERIES

J. LLOYD ABBOT, OWNER AND MANAGER

R. TAYLOR ABBOT, SALES MANAGER

Rt. 2, Box 182, Mobile, Ala.

Phone: Mobile 7-2048

LOCATION: Our Gardens and Nurseries are conveniently located at Abbot on the new four-lane U. S. Highway 90, just 5½ miles southwest of the Mobile City Limits. We are four miles northeast of Theodore where visitors to Bellingrath Gardens turn southeast from U. S. 90 to reach that world-famous show place. We are also on old U. S. 90.

COME TO SEE US. We cordially invite you to visit our Gardens. This is the first year of operation for the Gardens. However, many of the plants in our Gardens have been many years in their development period, and we feel justified in now making a start with most modest claims for the beauty our Gardens have yet attained. We hope, and believe, that the beauty of the Gardens will measurably increase from year to year. We are going to leave no stone unturned to continually enhance its beauty.

We are told that our collection of large specimen size Camellia Japonica plants is one of the largest. Many friends say that our collection of large specimen Alba Plenas surpasses anything else. We think you will enjoy seeing them.

(Azaleas, broad-leaved evergreens, coniferous evergreens, deciduous trees and shrubs, and miscellaneous plants and grasses are on separate lists—please ask for them if interested).

CAMELLIA JAPONICA

The winter-flowering *Camellia Japonica*s are truly the aristocrats of Southern gardens, and rightly so, since who could imagine a better combination than a lustrous ever-green shrub of outstanding year-round dignity and beauty, together with the endless glory of magnificent blossoms in countless forms and colors at a time of the year when our Northern friends would think flowers could only come from the greenhouse.

The ever-widening choice of *Camellia* varieties and species being made available makes it possible for the *Camellia* grower to have flowers on his breakfast table every morning from late August to early April. We have indicated the approximate blooming time for each variety. In general, early varieties are at the height of their bloom before Christmas, mid-season varieties from Christmas to early February, and late varieties in February and March in this area. Of course there is much overlapping, and we have marked some varieties with two symbols to indicate this. In some seasons blooms come sooner or later than their normal blooming periods.

Complete planting and cultural suggestions will be sent on request. There is included a discussion of the question "How far north will *Camellias* grow outdoors?" and a paragraph on **When Should Azaleas and Camellias be Set Out?**

(The *Camellia Sasanqua* list immediately follows this *Camellias Japonica* list).

ABBREVIATIONS USED: Sm—Small Blooms; Me—Medium Sized Blooms; Lr—Large Bloom; VLr—Very Large Bloom; D—Imbricated Double; RD—Rose Form Double; SD—Semi-Double; S—Single; P—Peony, Incomplete Double, Anemone Form, Irregular Semi-Double, Loose Peony, Snowball, Pompom, Hemispherical Type Bloom, etc.; BR—Bare Root; B&B—Balled and Burlapped; G—Grafts; OR—Own Root; 1 Qt—1 Quart Container; 1 Gal—1 Gallon Container; 4 Gal—4 Gallon Container; Vari—Variegated; (E)—Early Season Bloomer; (M)—Mid-Season Bloomer; (L)—Late Season Bloomer; VR—Very Rare; RGI—Rare Group I; RGII—Rare Group II; RGIII—Rare Group III; Cl AI—Class AI; ClA—Class A; ClB—Class B.

THE DESCRIPTION, AND THE PLANTS AVAILABLE OF EACH VARIETY IS GIVEN IN THE FOLLOWING MANNER: First, the COLOR of the Bloom, then in order, the SIZE of the Bloom, the TYPE of Bloom, the size and type PLANTS of that variety which we can this season offer to our customers, the SEASON in which the variety blooms—namely EARLY, MID-SEASON, or LATE, and then the PRICE CATEGORY, or PRICE CLASS, into which the variety falls, to enable you to readily find the price of each available size of the variety, by referring to the CAMELLIA PRICE LIST which is inclosed.

ADOLPH AUDUSSON—Red. VLr; SD; OR to 24"; G 18-24" to 4-5'; 1 & 4 Gal; (M) RGII.

The last item in the above descriptions of each variety tells you the PRICE CATEGORY or PRICE CLASS of each variety, in order that you will know where to look for the prices of any variety you desire to purchase.

CAMELLIA SASANQUA

The hardy Sasanqua species of Camellia is now available in a number of different colors and forms, and is especially recommended for areas where it might be too cold for Japonicas. While some Sasanquas are dwarf, the group as a whole is vigorous in igrowth, and has smaller leaves and smaller blooms than the Japonicas, and Sasanquas bloom more profusely. Appearing in October, November, and December, the blooms come at a time when they are not apt to be hurt by freezing weather. Sasanquas are very desirable for landscape purposes, and the flowers make wonderful garden displays and are useful for indoor arrangement in vases since they are borne on long stems.

BLUSH SINGLE—Blush Pink. Apple blossom type. S; Lath to 18''; Cl B.
